Yes. That info is not entirely correct. A small team from EPA (3 from ODGWD, 1 from OST, 2 from ORD and in coordination with 2 staff from region 3) reviewed a draft statement and provided comments to an official at NIEHS yesterday. It was not a peer review, but a consultation on the draft document and several background toxicology studies. The EPA staff did all of their work in about 24 hours. We did not review the final document. Please let me know if you need more info.

Subject: CDC data/analysis of 1ppm figure

Hi folks—we got word through the press office that CDC today is releasing data or some sort of analysis of the 1 ppm value for MCHM, which has been peer reviewed by two people in ORD and one person in OGWDW. Do you guys have any info on how large of a role we played in that review?

Thanks,
John
